of AAPL and NAPE*

AAPL adds more 'Energy' to the Mining and Land Resources Institute

AAPL and its Mining & Land Resources Institute Committee led by Chairman Orson Tingy is thrilled to announce that the 2025 Institute is evolving to reflect the dynamic energy landscape. This year, the event is expanding to include comprehensive educational sessions on additional energy sources, making it a premier gathering for landmen and other professionals across the energy sector.

Mark your calendars for April 23-24 and prepare to experience an unforgettable two-day institute set against the breathtaking backdrop of Lake Tahoe, Nevada. With a blend of insightful presentations and networking opportunities, this regional event is perfect for energy professionals seeking to stay ahead in the evolving land profession and energy industry.

As a special prelude to the main event, attendees have the unique opportunity to participate in an exclusive tour of the Steamboat Hills Complex geothermal power plant, led by Ormat Technologies Inc. (NYSE: ORA), on April 22. This remarkable facility, located just outside Reno, Nevada, stands on both public and privately leased and owned lands. The Steamboat Hills Complex comprises six cutting-edge power plants utilizing binary systems and both air- and water-cooling technologies. With a generating capacity of 84 megawatts, the complex has been a cornerstone of renewable energy since its first plant commenced operations in 1992, with the most recent addition launched in 2020. Hosted by Ormat Technologies, a leader in delivering around-the-clock renewable power solutions worldwide, this tour offers a behind-the-scenes look at sustainable energy in action.

MALRI 2025 is packed with a diverse range of sessions covering multiple energy sectors designed to equip attendees with the latest insights and practical knowledge.

Like last year's event, attendees can earn up to 12 continuing education credits, including one ethics credit, making MALRI 2025 an excellent investment in professional development.

In addition to the educational sessions, MALRI offers ample opportunities to connect with fellow energy professionals. At a special reception and multiple breakfast and lunch events, participants can forge new connections and strengthen existing ones, all while enjoying the serene beauty of Lake Tahoe.

The AAPL Mining & Land Resources Institute in Lake Tahoe is set to be an extraordinary experience for landmen and energy professionals dedicated to staying informed and engaged in the future of energy. Be part of the conversation that shapes the next chapter in mining, land and energy resource management. Reserve your spot today and take advantage of this unique blend of education, networking and scenic inspiration. If you have never attended MALRI, try it out in 2025. We look forward to welcoming you to this exceptional institute! ▲
